## STANDARD FEATURES

### Aesthetics

- **Stainless Steel Escutcheons** - Corrosion-resistant fixture covers add an elegant, glimmering accent.

### Green Technology

- **ArcticPac Insulation** - This double-layered insulation system features a reflective sheet of bubble-foil lining the inside of the cabinet, combined with a coat of Icynene™ foam that adheres to the spa's shell and hose connectors.  
The ArcticPac Insulation retains heat, keeping the spa energy efficient and the water at a tropical temperature.
- **Maintenance-Free Cabinet** - Synthetic cabinets weigh less than wood, yet are more resilient and durable. Unlike wood, these cabinets will not crack, chip, warp or rot.

### Protecting Your Spa

- **Lucite Acrylic with Microban** - Microban antimicrobial protection inhibits the growth of bacteria on the spa's shell aiding the prevention of odours and stains between cleanings.  
 Available on select shell colours.
- **ABS Base** - ABS base is a sealing for the bottom of your spa. Unlike traditional spas that only use plywood, an ABS bottom will not rot and protects your spa from the elements and rodents.
- **Spa Cover** - The ASTM Deluxe safety cover helps insulate and protect your spa.
- **Warranty** - 12 year warranty on the structure, and a 1 year warranty as standard on surface, parts, labour and plumbing.

## OPTIONAL UPGRADES

- **Ozone** - The ozone water treatment provides crystal clear spa water by killing bacteria with fewer harsh chemicals.
- **Lighting** - Saturate your spa with your favourite colour using a multi-coloured spa light.
- **Smart Energy Savings Package\*** - Provides energy efficient, Icynene™ full foam and floating insulation blanket. This additional insulation package makes the Garden spas even more energy efficient.

\*The spas have been tested in accordance to California Energy Guide.
